

XLSX to CSV Converter

Overview

The XLSX to CSV Converter is a secure, browser-based utility developed by **Braiswick Photographic** to simplify the preparation of school management data for photography workflows. The application converts Excel spreadsheets into clean, standardised CSV files compatible with Braiswick Photographic production systems. All processing takes place locally within the user's web browser.

Features

- Convert .xlsx, .xls, .xlsm and .ods files to CSV.
- Supports Primary and Secondary school formats.
- Compatible with SIMS, Arbor, BromCom, Integris, ScholarPack and other MIS systems.
- Validates required columns.
- Removes empty rows and columns.
- Cleans invalid characters.
- Search, sort and edit records before export.
- Generates multiple CSV formats.
- ZIP download and optional AES-256 encrypted exports.
- Email helper for secure submission.

Privacy Policy

Introduction

Braiswick Photographic is committed to protecting your privacy. This application is designed so that sensitive school data remains under your control.

Information Processed

Student names, admission numbers, registration groups, class information and other spreadsheet data may be processed solely to create correctly formatted CSV files.

Local Processing

All spreadsheet processing is performed locally within your web browser. Files are not uploaded to Braiswick Photographic servers during conversion.

Encryption

When selected, exported CSV files are packaged into a password-protected AES-256 encrypted archive to help protect data during transfer.

Data Storage

The application does not permanently store uploaded spreadsheets, generated CSV files or student records. Files remain only on your device unless you choose to share them.

Cookies

The application does not use cookies for tracking, advertising or analytics.

Third-Party Libraries

Trusted open-source libraries are used for spreadsheet reading, CSV generation, ZIP creation, downloads and encryption. They operate entirely within your browser.

Security

Industry-standard measures including local processing and AES-256 encrypted exports help protect your information.

GDPR

The application supports UK GDPR principles by minimising data transmission and processing data locally. Schools remain the Data Controller.
